

Digital Boardroom Solution

Live picture of your company on triple displays

runs SAP® software

VESTEL

In today's business world, most executives are challenged by heterogeneous reporting solutions and meetings dominated by static content. What the executives need are the real-time business intelligence, ad hoc reporting and what-if analysis to make decisions. This is where SAP Digital Boardroom with Vestel Interactive Flat Panel Displays (IFPD) emerges as a promising solution since it transforms executive meetings from one-way presentations to discussions based on real-time facts. Thanks to our recent partnership with SAP, Vestel Interactive Flat Panel Displays now fully support the Digital Boardroom. Equipped with touch screens, Vestel IFPDs are ready to boost your business' performance by providing you the real-time data of your company.

Extended Content
